Our story

Excellence in Italian Manufacturing

Italtveneta Didattica is an Italian company with over 40 years of experience in the design and production of **high-quality sports equipment**. Based in the province of Venice, we combine Italian craftsmanship and advanced technology to create durable and safe products.

Experience and Expertise

Since 1978, Italtveneta Didattica has been **synonymous with excellence**. Every product is designed to meet the specific needs of sports facilities, from gyms to schools, ensuring **performance and safety**.

Made in Italy

With a 1,000 sqm production area equipped with modern molding technologies, we offer sports equipment entirely made in Italy. The **combination of craftsmanship and advanced technology** guarantees quality and durability over time.

Solutions for Every Sports Need

WIDE RANGE OF PRODUCTS

From functional training equipment to gym furniture, our range covers every sports need. Versatile and customizable products, ideal for every sport.

FLEXIBILITY

We offer tailor-made solutions for every type of sports facility. Each product can be customized to best meet the specific needs of our clients.

Guaranteed Quality and Continuous Support

For us, quality is not limited to products; it also extends to the service we provide. With a 3,000 sqm warehouse and an efficient organization, we ensure prompt delivery and continuous support.

Quality and Safety

Our products are certified according to the most stringent international standards to ensure the safety of every item and piece of equipment.

Made with non-toxic and safe materials, each product is designed to last over time, maintaining vibrant colours, wear resistance, and reliability even after intensive use, always ensuring maximum safety for children and young people.

Comprehensive service

We provide continuous support to our clients, assisting them at every stage, from initial technical consultation to post-sales maintenance.

Our service includes the ability to replace individual parts even years after purchase, ensuring the full functionality and longevity of our equipment.

This approach reduces waste and enhances the long-term value of the investment.

Why are certifications important?

Children, through play, learn to understand the world and interact with others. It is essential that the toys with which children spend their days at home, school, or in the gym are safe and **do not cause accidents**.

Italveneta Didattica toys are **100% safe** as they have passed rigorous tests by international certifying bodies, ensuring their total safety and guaranteeing a **consistently reliable product**.

Safety and CE Mark

Free movement in the EU

Directive 2009/48/EC

Establishes safety standards for toys and their free movement within the European Community, applying to products intended for children under 14 years of age. It defines the responsibilities of manufacturers, importers, and distributors, specifies the CE marking to indicate compliance with regulatory requirements, and introduces obligations regarding warnings and legal markings.

UNI EN 71-1
Mechanical and physical properties

Mechanical and physical requirements

UNI EN 71-1

Establishes the requirements and test methods for the mechanical and physical properties of toys. The tests examine materials, edges, sharp points and wires, sharp edges, packaging, warnings, instructions for use, CE marking, and age suitability. It applies to new toys, considering the normal or foreseeable conditions of use, as well as typical children's behavior.

UNI EN 71-2
Flammability properties

Flammability tests

UNI EN 71-2

Specifies the flammability requirements for toys. The tests check that the product does not contain prohibited flammable materials and define the flammability requirements for certain toys when exposed to a flame source.

UNI EN 71-3
Chemical properties

Chemical requirements

UNI EN 71-3

Establishes the requirements and test methods for the migration of specific chemical elements (antimony, arsenic, barium, cadmium, chromium, lead, mercury, and selenium) from the materials used in toys. The tests verify the chemical properties of the product, excluding non-accessible materials.

Reviews from our clients

BP

Baby Party

Genuine **made in Italy** products with proven quality. This is not my first purchase for **professional supplies**, which have always met expectations. Helpful and professional staff. Top-notch!

AP

Alberto P

The products are of **above-average quality**. The staff is qualified and able to understand the customer's needs and offer the ideal solution. Timely delivery and **competitive prices**.

EM

Emilio M

As a sports educator, I can confirm the high quality and functionality of their products, which prove to be a **valuable ally** for those working in the world of sports and education. Italveneta products are characterized by being **extremely versatile and easy to use**, both in professional settings and in recreational-educational activities. Safety is a key element: each item is made with certified materials and **designed to ensure the safety** of those who use them, including both children and adults. Another strength is efficiency: with just a few tools, it is possible to create **complete training circuits**, ranging from muscle and aerobic exercises to high-performance courses, **adaptable to different needs** and levels of physical preparation.

Psychomotor kits

Designed to **stimulate coordination** and movement-based games. They include gym poles, flat hoops, pathway blocks, and balance beams. All kits are suitable for groups of **various ages** and allow the creation of balance courses with **different levels of difficulty**.

The components are modular and perfectly compatible with each other for maximum flexibility. It's possible to create **endless courses** using your imagination.

ART. 102 KIT A

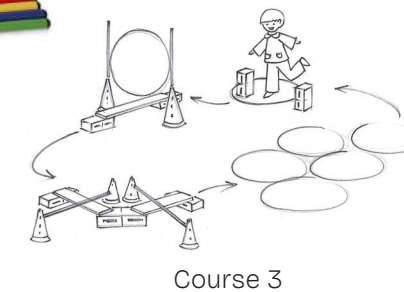

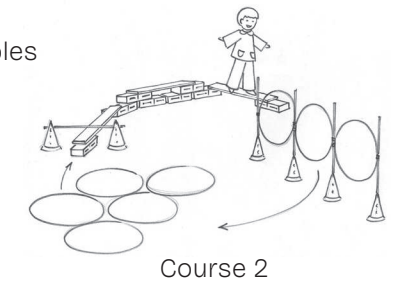

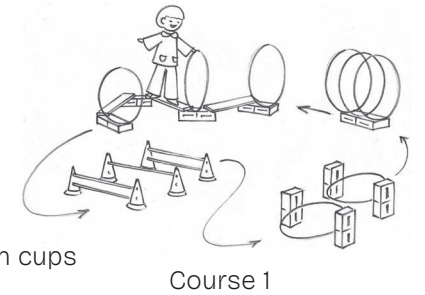

- 5 course blocks
- 4 bases with 25 mm holes
- 4 flat hoops (2 Ø50 cm, 1 Ø60 cm, 1 Ø65 cm)
- 12 gym poles l. 110 cm
- 2 cones h. 30 cm, 12 holes
- 2 jolly support clips
- 4 pole-pole clips

Psychomotor kits

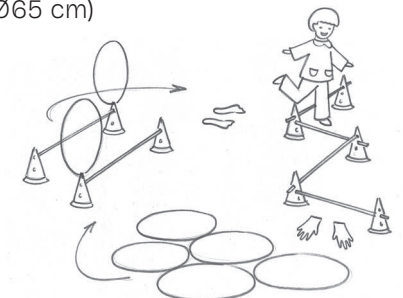

ART. 103 KIT B

- 5 gym poles l. 110 cm
- 9 course blocks + 24 suction cups
- 6 pole-flat hoop clips
- 8 flat hoops Ø65 cm
- 6 cones h. 30 cm, 12 holes
- 3 slats

ART. 104 KIT C

- 1 motor skills footprints set (6 hands + 6 foot)
- 7 flat hoops (5 Ø50 cm, 2 Ø65 cm)
- 9 cones h. 30 cm, 12 holes
- 2 pole-flat hoop clips
- 6 gym poles l. 110 cm

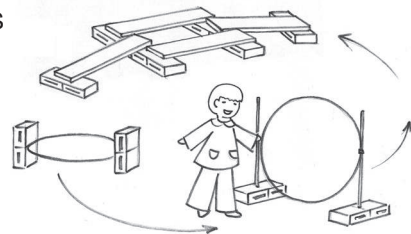

Psychomotor kits

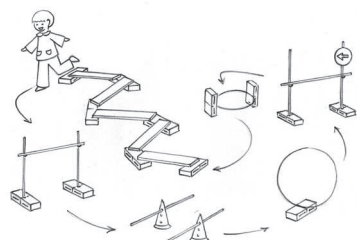

ART. 105 KIT D

- 2 gym poles l. 110 cm
- 10 course blocks + 24 suction cups
- 2 pole-flat hoop clips
- 2 flat hoops Ø65 cm
- 4 slats

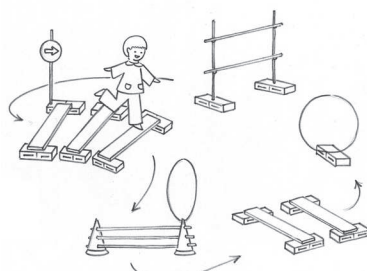

ART. 106 KIT E

- 13 course blocks + 40 suction cups
- 1 Arrow road sign
- 8 gym poles l. 110 cm
- 2 flat hoops Ø65 cm
- 2 cones h. 30 cm, 12 holes
- 4 jolly support clips
- 5 slats

Course 2

Course 1

Psychomotor kits

ART. 120 HOOP and POLE

- 8 flat hoops Ø30 cm
- 1 gym pole l. 60 cm
- 1 giant brick

ART. 121 HOUSE of POLES

- 16 gym poles l. 120 cm
- 4 giant bricks
- 20 pole-pole clips

ART. 122 HOOP TUNNEL

- 3 flat hoops Ø65-70-80 cm
- 6 giant bricks

ART. 124 SALTA SALTA

- 5 gym poles l. 120 cm
- 10 giant bricks

Psychomotor kits

ART. 094 Large SALTERELLO

- 12 gym poles (6 l. 70cm, 6 l. 80cm)
- 6 flat hoops Ø65 cm
- 6 cones h. 30 cm, 12 holes

ART. 095 Small SALTERELLO

- 9 gym poles (3 l. 60cm, 3 l. 70cm, 3 l. 80cm)
- 6 flat hoops Ø40 cm
- 6 cones h. 30 cm, 12 holes

ART. 096 Large MULTISALTERELLO

- 16 gym poles (8 l. 70cm, 8 l. 80cm)
- 8 flat hoops Ø50 cm
- 8 cones h. 50 cm, 12 holes

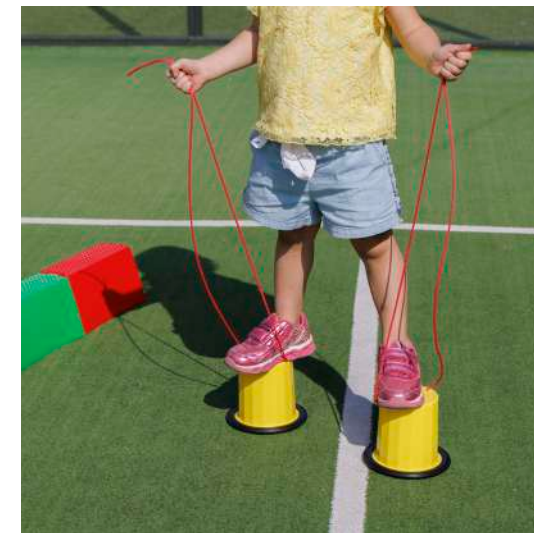

ART. 097 Small MULTISALTERELLO

- 20 gym poles (10 l. 60cm, 10 l. 80cm)
- 8 flat hoops Ø40 cm
- 8 cones h. 30 cm, 12 holes

Stilts

Pair of STILTS

ART. 141

WITH anti-slip rubber

ART. 142

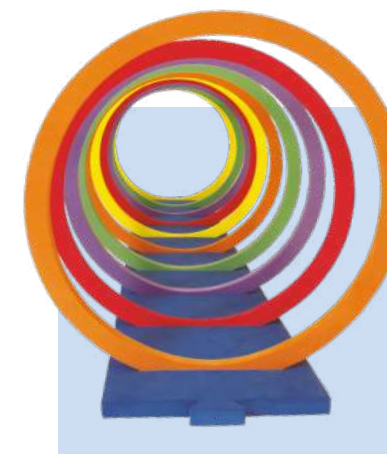

WITHOUT anti-slip rubber

blue green yellow red

The upper surface is textured for better **foot grip** and equipped with an **adjustable cord** suitable for any height.

ART. 144 Vortex TUNNEL

- 10 coloured hoops
- 1 blue base 100x25 cm

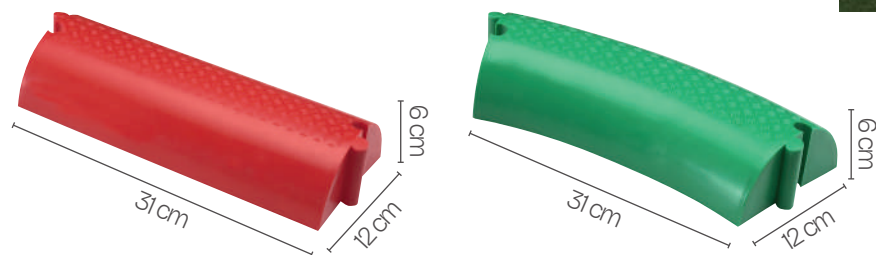

Thanks to the **soft Polymat base** for knee support, it helps explore **tactile and visual sensations**.

Tunnel course

Motor courses

Composed of 12 straight bricks and 12 curved bricks **with anti-slip serration**, they are made in a semicylindrical shape to **increase the level of difficulty**, allowing the child to test and improve their **balance and dexterity**.

The elements interlock securely and stably, forming **various and colourful paths**.

ART. 070 Semispherical course

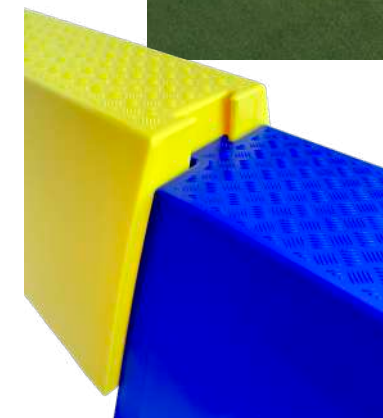

- 12 straight semispherical pcs
- 12 curved semispherical pcs

Motor courses

Stable blocks that interlock with each other to form different pathways and **balance exercises**. They help children gain greater confidence in their motor skills and **practice movement coordination**.

The block features a **serrated anti-slip texture** that protects the child from potential falls and helps them feel more secure.

Interlocking system

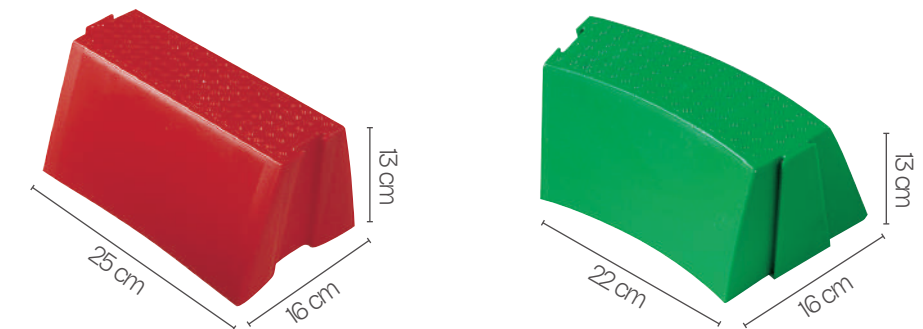

Block course

ART. 059

12 straight blocks
assorted in 4 colours

ART. 060

12 curved blocks
assorted in 4 colours

Motor courses

The path is created with **plastic slats and bricks** featuring holes and slots for inserting rings or poles, and suction cups to securely adhere to any type of flooring.

It is possible to build **various balance paths** for **spatial motor skills learning**, with or without obstacles, adaptable to any age group.

ART. 061 Balance course

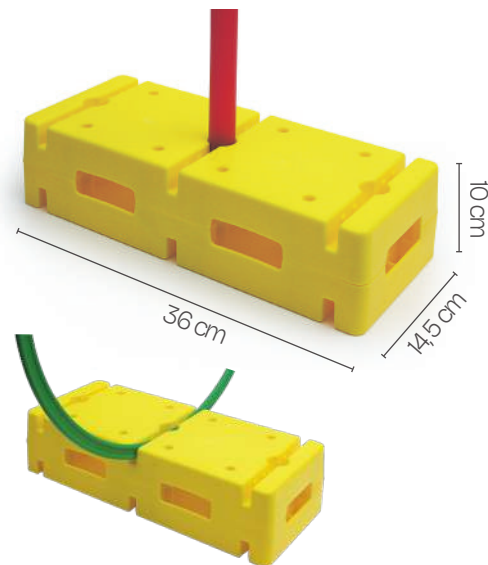

- 5 plastic slats length 75 cm
- 6 course blocks
- 24 suction cups

Course BLOCK

ART. 098

With holes and slots for inserting poles and flat hoops

Suction cups set

ART. 099

- 4 suction cups
- 3 pins

Fillable stable base

SPHERICAL BASE

ART. 109

Ø 25 mm hole

The course consists of bases and arches that successively form a colorful tunnel where children can experiment with different games and skills, such as **spatial coordination** and the ability to navigate and **interact with other children**.

It can be used alone or as an **additional element** with other motor courses.

ART. 140 TUNNEL course

- 4 arches
- 8 bases

Base | Compatible with balance course

Markers

The markers are made of **ultra-resistant, non-toxic plastic**, reinforced with **circular hints**. They are ideal for marking indoor and outdoor areas during sports, recreational, and psychomotor activities.

They enable the creation of training paths suitable for all ages and come with a **practical storage holder**.
